Borneo

COLLECTION

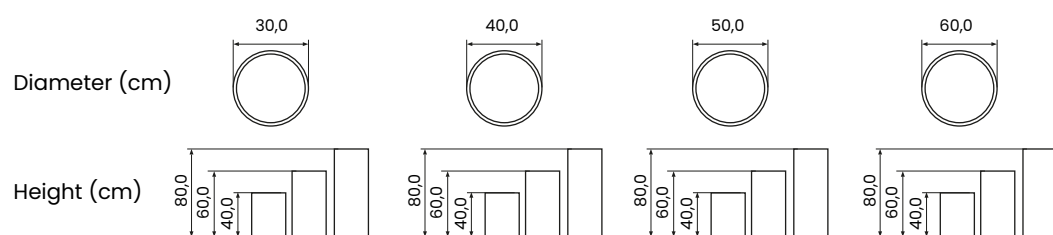

Minimalistic planter collection of a classic, geometrical shape. It perfectly works for modern, rustical, retro and many other spaces. A very stylish rusty shade warms up the place and intensifies the green of plants. A great choice of shapes and sizes makes it possible to create a design in one style and colour, no matter if it is a balcony, a patio or a garden. 'Borneo' products are made of both: stainless and corten steel. Thanks to this exclusive combination, planters get true luxurious look.

La Palma

COLLECTION

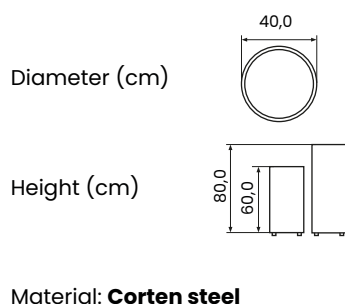

Unique and carefully decorated 'La Palma' planters are a real treat for the tropics lovers, who dream of an exotic style in their own garden or a patio. The expressive planters are decorated with an openwork motif of a palm leaf. Thanks to a great choice of models, you can make every space exceptional and distinctive. 'La Palma' products are made of a combination of stainless and corten steel, which not only enhances the aesthetic qualities of the planters, but also contributes to their durability and solidity.

The image shows three pieces of outdoor furniture from the TREBO collection, made of rusted steel with a laser-cut leaf pattern. A tall rectangular screen stands in the center, flanked by two planters. The planter on the left is cylindrical and holds a tall palm-like plant. The planter on the right is rectangular and holds a low-growing white-flowered plant. The background is a modern building with vertical wooden slats.

Trebo

COLLECTION

The 'TREBO' collection is a nod towards nature and greenery. All models are decorated with an openwork motif of a calathea leaf. Warm, rusty shade of steel intensively contrasts with the plants and emphasizes their green tones. TREBO planters look great both when solo and in a group of many. 'TREBO' products are made of a combination of stainless and corten steel, which not only enhances their aesthetic qualities, but also contributes to the durability and solidity of the TREBO series.

About us

We have been on the market for many years offering premium products. From the beginning, we focus on handmade production. The products of our brands are made from European materials at our headquarters in Poland. Our BBQ brand enjoys enduring popularity in Europe and beyond.

We decided to turn our many years of experience into the creation of a new brand – the Coyotto brand. Our knowledge and commitment enables us to deliver products that meet market expectations. Corten steel is known for its resistance to frost, UV rays, precipitation or mechanical damage. For this reason, we have opted for Corten steel, which will guarantee our customers durability and reliability for many years.
