# TENDERFLAME

VALUABLE MOMENTS...

Enjoy time with our loved ones.  
Feel safe and happy.

A combination of raw materials,  
eco intelligence, sustainable variations.  
We should embrace the heritage  
of the nature.

Due to the nature of neutral tones,  
there is no season attached to them.

Warmth and comfort are key ingredients.

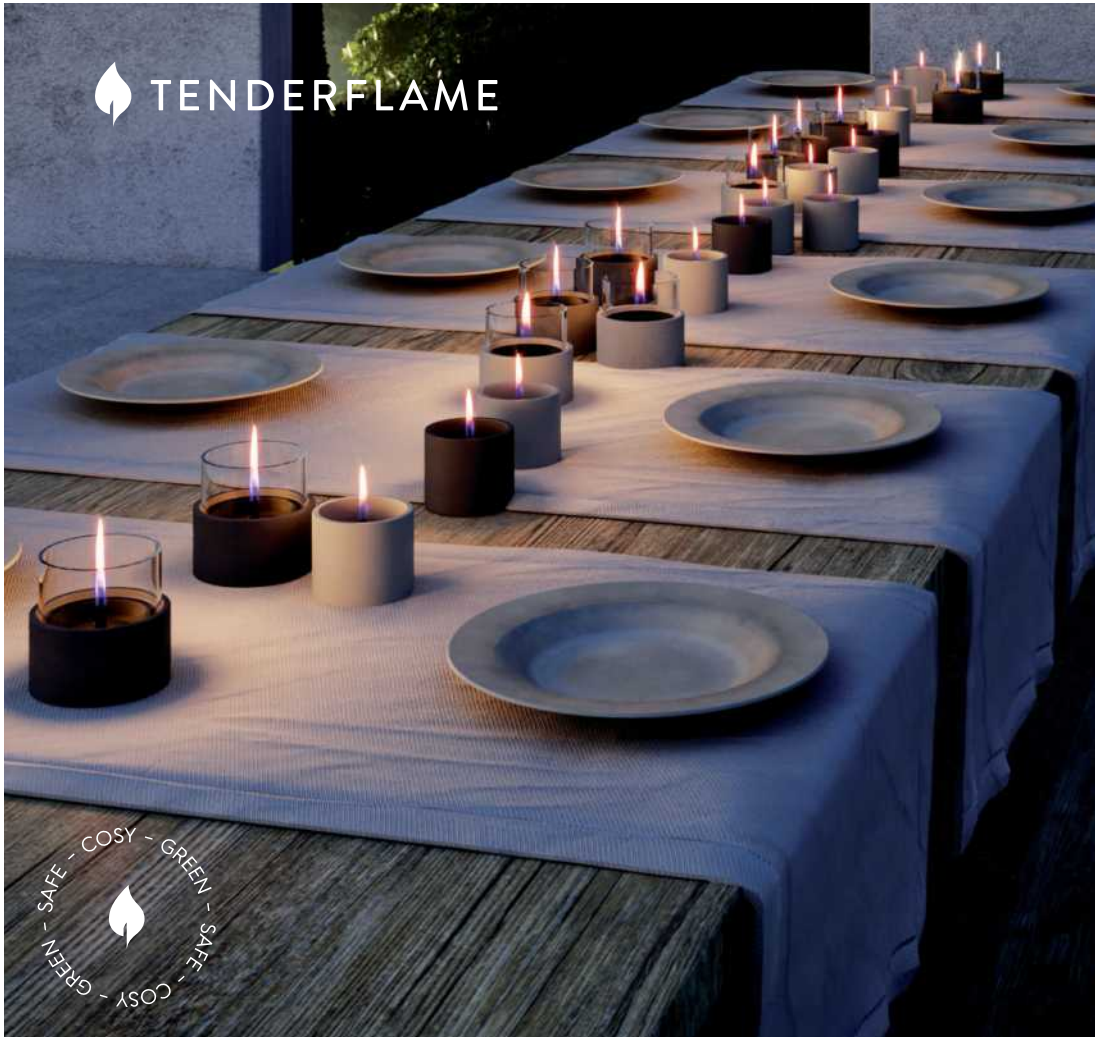

This is our home...

Let's take care of it together!

GREEN - SAFE - COSY - GREEN - SAFE - COSY

## BRAND VALUES

### SAFE

TenderFlame is the simple solution for creating a pleasant atmosphere. We do not use Bioethanol, but have developed TenderFuel as a safe and secure alternative. TenderFlame does not pollute and is so safe that you can refill while your candle or fireplace is burning.

### COSY

TenderFlame creates a pleasant atmosphere both inside and outside. Our lights and lanterns are designed to a cozy atmosphere on the table, and the fireplaces give you the atmosphere you know from traditional fireplaces. Enjoy every apartment or house, even if you do not have a chimney.

### GREEN

We do everything we can to put a green footprint with TenderFlame. We do not soot, and emit very few particles. 50 of our Little 8 pollutes less than a tea light. So if you want to create a green good indoor climate, while enjoying yourself, TenderFlame is the clear first choice.

## HALVOR BAKKE COLLECTION 2022

South Africa and Cape Town have huge place in Halvor's heart. They have been inspirations for the new TenderFlame Outdoor collection.

Cape Town is one of the most beautiful cities in the world. Mountains – from sheer cliffs which rise from the oceans to valley upon valley separated by craggy peaks, forests, beaches, winelands and wheatlands, and the traditional Cape Dutch architecture responded by taking its cue from the grandeur of the setting.

The perfect ingredients to make a stunning outdoor collection.

You simply fall in love!

## FINN SCHJØLL COLLECTION 2022

We are proud and privileged to have a collaboration with Finn Schjøll himself. He is a big source of inspiration for all of us. With his generosity, beautiful decorations, floral tips and words of wisdom that he shares on TV and in social media every day.

With TenderFlame's unique technology and Finn's passion for flowers, colors and quality, we have developed a playful and elegant collection together.

The four elements FIRE – EARTH – AIR – WATER are the ingredients and inspiration for the new collection.

All products are just as nice inside as outside all year around. And it creates an incredible atmosphere.

CLEAN BURNING – ENVIRONMENT FRIENDLY – ALLERGY FRIENDLY  
– PERMANENT STEEL WICK – LIFE LONG WARRANTY

Thank you for contributing to a cleaner environment!

## **THERESE JOHAUG HEL VED COLLECTION 2022**

We are proud of our collaboration with Therese Johaug since 2016. Finally, we can present our new collection HEL VED “Norwegian Wood”. The collection has the unique TenderFlame technology and Therese’s design touch. With 100% pure certified Oak.

Our common passion for Norwegian nature, clean lines. A healthy lifestyle and real details in our home have inspired us to create this collection that contributes to a clean environment.

Thank you for joining our team!

## TenderFuel

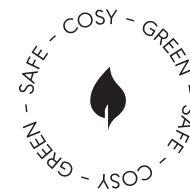

Our unique TenderFuel is a new and revolutionary fuel, which only works in combination with our patented steel wicks. Creates beautiful flames that burns cleaner than any comparable flame. Can be stored without restriction. TenderFuel is not toxic and not classified as flammable.

ART. NO 100701

## BlueFlame lighter

Our lighter is a blueflame lighter that has a very high flame temperature. This makes it very suitable for igniting our safe TenderFuel. It is also wind- and waterproof, so it is also ideal to bring with you for outdoor activities. The lighter is easy refillable.

## TENDERFLAME

We have developed TenderFlame to offer a safe and clean-burning flame that everyone can enjoy with no chimney or special ventilation. When we started the development, the goal was to create a safe alternative to bioethanol fireplaces, oil lamps, gas burners, and even candles. The key factor uniquely combines the patented steel wick and the non-flammable and non-toxic fuel.

## HOW IT WORKS

TenderFlame products contain a tank for the fuel and a burner with a wick made of stainless steel. TenderFuel must be poured into the tank, and the wick wetted with a small volume of fuel before it is lit.

TenderFuel has a flashpoint of 104° Celsius (219° Fahrenheit). TenderFuel is classified as non-flammable, non-toxic and non-hazardous.

The special wick allows the liquid to reach this temperature when you light it with the lighter, but the wick and the burner are constructed so that only the top of the wick has the necessary temperature. The liquid in the container remains well below 60° Celsius, so that it does not evaporate. To achieve a controlled combination of the temperature needed on the top of the wick and the low temperature in the tank, the wick is placed in a holder which hardly transfers any heat to the surroundings. Air flows in a controlled stream around the wick to cool the burner while also providing the ideal blend of air and liquid vapour.

The construction of the wick itself also contributes to the control of the temperature. It is made of stainless steel meshes in several layers. All products use the same patented technology, and they should all only use TenderFuel.

The capillary principle, which itself is generated by the layers in the wick and the controlled heat, is being used to feed the top of the wick with fuel from the tank.

Pouring the fuel on the flame does not result in a dangerous flare-up because of the high flashpoint. The flame can be put out by pouring fuel on it.

TenderFuel will hardly evaporate when not in use and leave no odour in the room.

It can be stored in unlimited quantities and sent without ADR limitations. MSDS or boEle warnings are unnecessary. This is well documented and confirmed by for instance REACH, KIWA and TûV.

Any spilt fuel will not burn if the burner is accidentally overturned. It only burns on the wick. The wick has a lifetime warranty.

## CLEAN BURNING

Reputable laboratories have extensively tested the combustion. It mainly produces water vapour and a minor amount of CO<sub>2</sub>. The CO<sub>2</sub> levels are well below the WHO and European authorities' limits.

If you compare a TenderFlame with a tea-light's flame, the ordinary tea-light produces more microparticles than 50 TenderFlame units.

## AREA OF USE

The burners can be used both inside and outside.

For further information on how to use and maintain each product, check the user manuals.

Design is not just what it looks like and feels like.  
Design is how it works.
